Work Experience

Fullstack Software Engineer, Profile Software S.A. – Athens Jan 2026 – Present

- Designed and developed a high-level loan application system within the core banking platform
- Implemented business logic and workflows to support loan processing and management

Fullstack Developer, Terracom S.A. – Ioannina Aug 2022 – Feb 2025

- Created **SQL queries and BI dashboards**, using **Jaspersoft**, for sales and customer support teams, enhancing campaign monitoring and decision-making.
- Contributed to the development of QR Patrol, a large-scale multi-tenant SaaS platform for security monitoring, built with **Angular (TypeScript)** on the frontend and **Node.js (Express)** with **MariaDB/MySQL** on the backend, delivering enterprise-grade functionality to thousands of active users.
- Built an experimental **AI assistant** that translated **natural language into SQL queries** empowered by **OpenAI**, enabling users to generate custom data grids and reducing manual query-writing time by ~ 70%.
- Contributed to the migration of a legacy **XOJO** project to **Angular TS**, modernizing the application for 2,000+ users and reducing technical debt by 30
- Coordinated the development of a **‘Time & Attendance’ module**, helping 50+ client organizations streamline payroll processing and reduce administrative effort by hours per week.

Fullstack Developer, Verus+ – Thessaloniki Jan 2021 – Aug 2022

- I was CEO’s assistant on several reports using **Power BI** in order to extract intel on clients’ behavior.
- Contributed to the Eco-Time Machine research program, developing an interactive map application with **.NET Core MVC**, **Leaflet.js**, and **CosmosDB** to visualize the historical development of the Kotyli region through dynamic GeoJSON layers.
- Built a module **dynamic form builder** (*reused in Eco-Time Machine and Biomonitoring*) that allows forest rangers to report field events, significantly improving the consistency and adaptability of data collection.
- Deployed solutions on **Microsoft Azure**, integrating **Active Directory** for authentication and implementing policies based on claims to separate functionality between managers and standard users.
- Designed and deployed a **payment system for ISTH**, integrating **Piraeus Bank APIs** 2to automate subscription renewals and debt collection for 500+ members.

Additional Experience

IT Support Specialist, Hellenic Army (32 Marine Brigade) – Volos Jun 2025 – Dec 2025

- Provided technical support in headquarters and battalion offices of the 32 Marine Brigade, troubleshooting, and resolving hardware/software issues to ensure smooth daily operations.
- Performed PC setup and configuration on the local military network, including installation, system updates, and compliance with security protocols.
- Supported server administration and Active Directory management, handling user accounts, permissions, and authentication for multiple battalions.
- Assisted officers with operational reporting and presentations, preparing Excel-based analyses and daily briefings to support decision making.
- Coordinated hardware maintenance and upgrades, extending the lifecycle of computer systems and improving reliability in the brigade’s offices.

Technical and Secretarial Support, Athletic Taekwondo Federation – Thessaloniki Sep 2018 – Feb 2020

- Developed custom invoice tools to automate payment tracking and reduce manual processing time by 50%, improving financial operations for the federation.
- Streamlined the tournament bracket creation process, cutting preparation time and reducing errors during

national competitions.

- Provided technical setup and support on the playing field, configuring scoring systems (PCs, routers, TVs, and mobile devices) for multiple arenas.
- Acted as the primary troubleshooter during tournaments, resolving real-time technical issues across scoring systems to ensure uninterrupted matches.

Taekwondo Umpire, Athletic Taekwondo Federation – Thessaloniki

Oct 2017 – Sep 2018

- Served as an umpire for the Athletic Taekwondo Federation at multiple national and international tournaments, ensuring fair play and adherence to competition rules.

Education

University of Ioannina, MSc in Data and Computer Systems Engineering

Oct 2021 – Mar 2024

- GPA: 8.94/10.0
- Coursework: Data Mining, Social Networks, Biomedical Data Analysis
- Thesis: Modularity-Based Fairness in Network Communities

University of Macedonia, BS in Applied Informatics

Sep 2015 – Sep 2021

- GPA: 6.7/10.0
- Thesis: Entity Resolution using the Spark Framework

Publications

Konstantinos Manolis, Evaggelia Pitoura — *Modularity-Based Fairness in Community Detection*, DOI: 10.1145/3625007.3627518, March 2024

Projects

Simplified CMS

Source

- Built a CMS for small businesses to manage website content independently, supporting modular features (appointments, inventory).
- Tools: React, MongoDB, Vercel

Multiplayer Tic Tac Toe

Source

- Developed a multiplayer game with three modes: AI, hot-seat, and online via WebSockets.
- Tools: React, Node.js, WebSockets

Technologies

Languages: JavaScript, Python, Java, C#

Technologies: Angular, React, Node.js, .NET Core, Microservices, RabbitMQ, Redis, Docker, Git, AI Agents

Hobbies

Passionate about fitness through gym training and running. Collector of vinyl records and manga, reflecting curiosity for culture and storytelling. Currently writing scripts and narratives for an indie game in development, blending creativity with technical skills.
